

The UltraVision System[®]

1

Feasibility PHASE

You begin by clarifying your strategic goals. Next you work with us to inventory, organize and crystallize your old plan and its financial capacities. This phase ends with an estimate of your benefits from implementing The UltraVision System[®].

2

Design PHASE

Next we work with you and your chosen advisors to build your new plan. At the end of this phase you will receive a detailed action plan that empowers you to achieve the benefits of your new plan.

3

Implementation PHASE

A plan without action is valueless. During this phase we work to implement your action plan. Our involvement assures consistency with your goals and your new plan. Your new plan is now fully implemented.

4

Review PHASE

With your new plan in place, we measure the actual progress of your plan periodically. We work with you to confirm the current appropriateness of your previously stated goals. When necessary, you restart The UltraVision System[®].
